Last Month Performance: Sept

NEW FOLLOWERS 4 +1% from Aug	TOTAL REACH 5,037 views +63% from Aug	CONTENT SHARED 7
TOTAL INTERACTIONS 59 34% followers 66% non-followers	PROFILE VISITS 154 Accounts +133% from Aug	EXTERNAL LINK TAPS 6x +1% from Aug

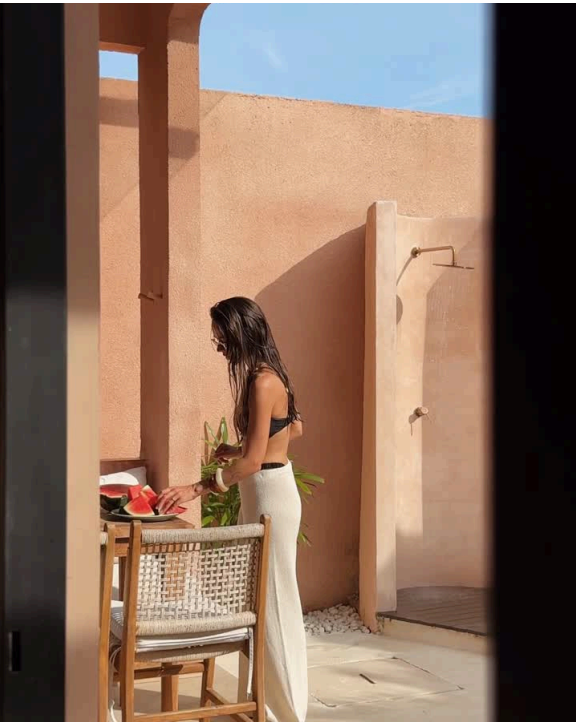

September rebounded strongly from August, with reach up 63% (1,895 to 5,037) and profile visits more than doubling to 154 — likely driven by the collab content with Lizzy, pushing the account back into discovery mode, with 66% of interactions coming from non-followers. Link taps held at 6x, keeping booking intent stable.

The one gap: new followers dropped to 4 despite the wider reach, and content shared stayed flat at 7 for the third month straight. Both signals that the content is being seen but not compelling enough to follow or share. A collab layered on top of people-led content in October could push reach past 6,000 for the first time without external amplification.
